

Utilising Our Flexibility

PCS offers a variety of lifting equipment in the rapidly changing and complex sectors such as Power, Water and Transport. By concentrating on particular parts of this energy chain, these purpose built cranes improve performance and operational effectiveness..

Utility cranes are designed for:

- ↳ Heavy lifting capacities;
- ↳ Weather protection;
- ↳ Accurate and smooth operations.
- ↳ Cost effective power consumption.

Utility crane requirements:

- ↳ Inverter controls;
- ↳ IP 66 and Stainless Steel accessories;
- ↳ Low maintenance.

These superb PCS cranes are often highly customised with a range of electronic, electrical and mechanical controls to suit client specific requirements, designed for particular projects.
